Serial No. 09/583200 Art Unit 1644

- 1. Regarding peptides recited in the claims, it would expedite prosecution if applicant indicated which parent applications disclosed the particular peptides recited in the claims.
- 2. This application contains claims directed to the following patentably distinct species of the claimed invention:

The particular peptides recited in claim 1,14,26-29. Applicant needs to elect a particular peptide. It is noted that claim 20 reads on a peptide containing eight of the peptides recited in said claim (eg. wherein said eight peptides are linked). The elected peptide can be any one peptide encompassed by the aforementioned claims (eg. the elected peptide could be a peptide containing eight of the peptides recited in claim 20).

These peptides have different amino acid sequences.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

- 3. This application contains claims directed to the following patentably distinct species of the claimed invention:
 - a) a composition/vaccine containing a HTL epitope
 - b) a composition/vaccine containing a CTL epitope
 - c) a composition/vaccine containing a liposome
 - d) a composition/vaccine containing a lipidized peptide
 - e) a composition/vaccine containing a heteropolymer
 - f) a composition/vaccine containing a homopolymer
 - g) a composition/vaccine containing a peptide bound to a APC
 - h) a composition/vaccine containing a peptide bound to a tetramer

These compositions are functionally distinct and contain molecules that are chemically distinct.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Serial No. 09/583200 Art Unit 1644

4. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

- 5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
- 6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
- 7. Papers related to this application may be submitted to Group 1600 by facsimile transmission. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). Papers should be faxed to Group 1600 at (703) 308-4242.
- 8. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Dr. Ron Schwadron whose telephone number is (703) 308-4680. The examiner can normally be reached Monday through Thursday from 7:30 to 6:00. A message may

be left on the examiners voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the Examiner's supervisor, Ms Christina Chan can be reached on (703) 308-3973. Any inquiry of a general nature or relating to the status of this application should be directed to the Group 1600 receptionist whose telephone number is (703) 308-0196.
